SUMMARY

Full-Stack Software Engineer with 5+ years of experience building production web applications, backend services, and business platforms. Strongest experience across **TypeScript, Node.js, NestJS, React, and Next.js**, with hands-on work across APIs, databases, authentication, deployment, and infrastructure.

Experienced across the software lifecycle from frontend and backend development to database design, deployment, debugging, and production operations. Currently focused on **Rust, systems programming, networking, Linux, infrastructure, and security-oriented engineering** through practical projects and hands-on development.

TECHNICAL SKILLS

Languages: TypeScript · JavaScript · Rust · Go

Backend: Node.js · NestJS · Express.js · REST APIs · GraphQL · WebSocket · API Design · Backend Architecture

Frontend: React · Next.js · React Query · Redux Toolkit · Zustand · Tailwind CSS

Databases: PostgreSQL · Redis · MongoDB · MySQL · SQLite · Prisma · TypeORM · Data Modeling

Infrastructure: Linux · Docker · Kubernetes · Nginx · CI/CD · Git · Server Provisioning · Deployment Automation

Networking & Security: DNS · HTTP/TLS · Reverse Proxying · IPv4/IPv6 · Container Networking · Authentication · Authorization · RBAC

Engineering: System Design · Debugging · Performance Optimization · Production Troubleshooting · Automation · Developer Tooling

PROFESSIONAL EXPERIENCE

Amen Security

Full-Stack Developer · 2024–2026 · Remote

- Built and maintained production web applications and business systems using **Next.js, TypeScript, NestJS, PostgreSQL, and TypeORM**.
- Developed frontend interfaces, backend services, REST APIs, business workflows, and administrative functionality.
- Implemented **authentication, authorization, RBAC, product management, inventory, and checkout workflows**.
- Worked across application, API, database, and infrastructure layers to diagnose and resolve production issues.
- Managed **Linux servers, Nginx, Docker, databases, deployments, and CI/CD workflows**.
- Worked on application performance, SEO, reliability, deployment processes, and production operations.

Independent

Freelance Full-Stack Developer · 2016–Present · Remote / Contract

- Delivered web applications and business software across **e-commerce, dashboards, automation tools, and custom business applications**.
- Built full-stack applications using **React, Next.js, TypeScript, Node.js, and NestJS**.
- Developed frontend architecture, backend services, REST APIs, integrations, business logic, and database-backed workflows.
- Designed and implemented data models using **PostgreSQL, MongoDB, MySQL, Redis, Prisma, and TypeORM**.
- Managed projects across architecture, implementation, debugging, deployment, and production maintenance.
- Built independent **Rust and Go projects** focused on developer tooling, networking, automation, and systems-oriented development.

Tose'e Atiara

Front-End Developer · 2023–2024

- Developed production **React** interfaces for e-commerce applications.
- Integrated frontend applications with REST APIs and backend services.
- Built reusable components and frontend workflows for shopping and business applications.
- Worked on frontend performance and user experience improvements.

Insanity Studio

Front-End Developer · 2022–2023

- Developed reusable **React** components and production interfaces for client projects.
 - Implemented frontend features and integrated applications with backend APIs.
 - Worked with state management and frontend architecture to maintain maintainable application code.
-

SELECTED PROJECTS

Aurum-rs

Rust · Systems Programming · Developer Tooling

Rust-based engineering project focused on practical systems-oriented development, Rust architecture, tooling, and software engineering.

GitHub: [BTF-Kabir-2020/aurum-rs](https://github.com/BTF-Kabir-2020/aurum-rs)

NebulaGrid

Rust · Axum · React · Vite · WebSocket · JWT · RBAC · Docker

Full-stack application combining a **Rust/Axum backend** with a React frontend. Covers API architecture, authentication, authorization, RBAC, real-time communication, and containerized development.

GitHub: [BTF-Kabir-2020/NebulaGrid](https://github.com/BTF-Kabir-2020/NebulaGrid)

BidiMD

Rust · Developer Tooling

Rust-based developer tooling project focused on practical software engineering workflows and systems-oriented development.

GitHub: [BTF-Kabir-2020/BidiMD](https://github.com/BTF-Kabir-2020/BidiMD)

Amen Gate

Security · Backend · Infrastructure

Security-oriented project involving backend services, access control, and infrastructure-related workflows.

Rust Networking & Systems Projects

Rust · Linux · Networking · Containers · Automation

Independent projects exploring networking, DNS, containerized environments, Linux systems, automation, and infrastructure-oriented development.
