Profile Summary

Full-Stack Software Engineer with **5+ years of experience** building and maintaining production **web applications, backend services, business platforms, and developer tooling**. Strong hands-on experience with **TypeScript, React, Next.js, Node.js, NestJS, Rust, and Go**, with practical knowledge across **backend architecture, APIs, databases, DevOps, infrastructure, and production troubleshooting**.

Experienced in delivering software **end-to-end**, from frontend implementation and API design to data modeling, backend development, deployment, and production operations. Currently focused on deeper work in **Rust, systems programming, networking, infrastructure, and security-oriented engineering**.

Technical Skills

Languages: TypeScript · JavaScript · Rust · Go

Frontend: React · Next.js · React Query · Redux Toolkit · Zustand · Tailwind CSS · Frontend Architecture

Backend & APIs: Node.js · NestJS · Express.js · REST APIs · GraphQL · WebSocket · API Design · Backend Architecture

Databases & Data: PostgreSQL · Redis · MongoDB · MySQL · SQLite · Prisma · TypeORM · Data Modeling

DevOps & Infrastructure: Linux · Docker · Kubernetes · Nginx · CI/CD · Git · GitHub · GitLab · Server Provisioning · Deployment Automation

Networking & Security: DNS · HTTP/TLS · Reverse Proxying · IPv4/IPv6 · Container Networking · Authentication · Authorization · RBAC · API Security

Engineering: System Design · Performance Optimization · Debugging · Production Troubleshooting · Automation · Developer Tooling

Professional Experience

◆ Full-Stack Developer — Amens Co.

2024 – 2026 · Remote

- Built and maintained production **security-focused and e-commerce applications** using **Next.js, TypeScript, NestJS, PostgreSQL, and TypeORM**.
- Developed **frontend interfaces, business workflows, REST APIs, and data-driven features** across application and administrative systems.
- Implemented **authentication, authorization, RBAC, product management, inventory, and checkout workflows**.
- Worked across **application, API, database, and infrastructure layers** to diagnose and resolve production issues.
- Managed **Linux servers, Nginx, Docker, databases, deployments, and CI/CD workflows**, improving **performance, SEO, reliability, and production operations**.

◆ Freelance Full-Stack Developer — Independent

2016 – Present · Remote / Contract

- Delivered **20+ web applications and business projects**, including e-commerce platforms, dashboards, automation tools, and custom business applications.
- Built full-stack applications using **React, Next.js, TypeScript, Node.js, and NestJS**, covering frontend architecture, backend services, APIs, integrations, and business logic.
- Designed database models and worked with **PostgreSQL, MongoDB, MySQL, Redis, Prisma, and TypeORM**.
- Managed the complete development lifecycle including **architecture, implementation, debugging, deployment, and production maintenance**.
- Built independent **Rust and Go projects** focused on CLI tooling, networking, automation, and systems-oriented development.

◆ Front-End Developer — Tose'e Atiara

2023 – 2024 · Tehran

- Developed production **React interfaces** for e-commerce applications and integrated frontend workflows with REST APIs and backend services.
- Built reusable components and improved **frontend performance and user experience** across shopping workflows.

◆ Front-End Developer — Insanity Studio

2022 – 2023 · Tehran

- Developed reusable **React components and production interfaces** for client projects.
- Worked with state management and frontend architecture to build **maintainable applications** and integrate frontend features with backend APIs.

Selected Projects

Aurum-rs

Rust · Systems Programming · Developer Tooling

Rust-based engineering project focused on practical systems-oriented development, with emphasis on **Rust architecture, tooling, and low-level software engineering**.

 [GitHub · BTF-Kabir-2020/aurum-rs](#)

NebulaGrid

Rust · Axum · React · Vite · WebSocket · JWT · RBAC · Docker

Full-stack application combining a **Rust/Axum backend** with a React frontend, covering **API architecture, authentication, authorization, RBAC, real-time communication, and containerized development**.

 [GitHub · BTF-Kabir-2020/NebulaGrid](#)

BidiMD

Rust · Developer Tooling

Rust-based developer tooling focused on practical software engineering workflows and **systems-oriented development**.

 [GitHub · BTF-Kabir-2020/BidiMD](#)

Amen Gate

Security · Backend · Infrastructure

Security-oriented project involving **backend services, access control, and infrastructure-related workflows**.

Rust Networking & Systems Projects

Rust · Linux · Networking · Containers · Automation

Independent projects exploring **networking, DNS, container infrastructure, automation, and Linux-based systems development**.

Engineering Focus

Full-Stack Delivery: Frontend → APIs → Data → Deployment → Production Operations

Systems & Infrastructure: Rust → Networking → Linux → Infrastructure → Security

Production Engineering: Debugging → Reliability → Performance → Automation → Maintainability

Education

Bachelor's Degree in Software Engineering

Islamic Azad University — Tehran

Professional Highlights

- Delivered **20+ freelance web projects** across e-commerce, dashboards, automation tools, and business applications.
- Built and maintained production systems spanning **frontend, backend, databases, deployment, and infrastructure**.
- Developed independent **Rust and Go projects** focused on developer tooling, networking, automation, and systems engineering.
- Hands-on experience with **production troubleshooting, performance optimization, deployment automation, and backend architecture**.
